I think that the only fields that we should send to Paul Sarahan is the (1) name of the company and (2) contact information, ie: attorney's name and contact information. We can give him a list of parties that we noticed as well that either didn't respond or said they were not willing to negotiate. We do not need to give him a narrative of their responses. If he wants all the responses, he can request them. This does not need to be complicated or have more information than name of PRP and contact information. Let me know if you have that information readily available. I would like to get him the list by Friday.

Amy,

First attached worksheet is for Sarahan. It identifies (1) PRPs that responded to GNLs, (2) PRPs willing to negotiate, (3) extracted narratives from their respective PRP's GNL responses, (4) and PRP's representatives. If OK, please forward it on to Sarahan.

Second worksheet is only an update of the file I sent to you earlier this week (only updated some of the extracted narratives).

Bob
